

GAR 16 210

Saviola x Casteline

- Early ripening time
- High yield potential
- Big sized tubers with attractive skin finish

VARIETY DESCRIPTION

Characteristics

Skin colour	Light Yellow
Flesh colour	Light Yellow
Fries quality	Substandard / 4.0
Tuber shape	Oval
Tubers per plant	9 - 11
Maturity	Early
Dormancy	Average
Berries	Few
Cooking type	AB
Average tuber length	81
Washability	Good
Underwater weight	315 - 335
Dry matter %	17 - 18 %

Sensitivity

Bruising	Slightly sensitive
Mechanical damage	Slightly sensitive
Growth cracks	Slightly sensitive
Secondary growth	Quite sensitive
Sencor (Metribuzin)	Slightly sensitive
Drought	Quite sensitive
Hollow hearts	Not sensitive

Resistances

Y virus	- / -
Yntn virus	- / -
Spraing	Slightly susceptible
Tuber blight	Not susceptible
Foliage blight	Not susceptible
Fusarium	Slightly susceptible
Common scab	Quite susceptible
Wart disease F1	- / -
Wart disease F2	- / -
Wart disease F6	- / -
Wart disease F18	- / -
PCN Ro1	- / -
PCN Ro2/3	- / -
PCN Pa2	- / -
PCN Pa3	- / -
Silver scurf	Not susceptible
Early blight	Not susceptible
Leaf roll	- / -
